PUBLIC ACCESS TROUT LAKES

"Where can I go fishing?" That's a question that people ask the Department of Game thousands of times each year. There are, of course, several hundred places in Washington where anglers can fish for trout, but many of these places are difficult to find, while others have no public access.

This fact sheet makes it easier for trout fishermen to find places to pursue their favorite pastime. It lists over 200 Washington lakes that have a fishable trout population and developed public access. Most of the access areas on these lakes are Department of Game access sites, but if fishing access is provided by a county park, U.S. Forest Service campground or other means, the lake is included on this list as well.

Lakes are listed by Department of Game region, with each regional section further broken down by county. The lakes in each county are listed alphabetically with size, location and trout species available. Limits, seasons and other fishing regulations are not listed. That information is available in the current *Washington Game Fish Regulations* pamphlet, available free wherever fishing and hunting licenses are sold.
